Lionel Gossman, professor emeritus of Romance languages and literatures at Princeton University, has written three books rolled into one – as his title makes clear. The first book is a study of Germanic political ideas – unseasonable ideas – as characterized by the faculty of the tiny University of Basel which at times during the nineteenth century had only sixty students and in one particularly lean year only enrolled three candidates for the Greek literature course taught by the young Friedrich Nietzsche. But despite its paucity in numbers, the Basel faculty held out against a Prussian intellectual tide rising in the University of Berlin and led by Leopold Ranke. In Basel small was beautiful and the study of historical culture and art history were thought liable to be corrupted rather than defended by the rise of the super-state in the manner Prussian historians advocated. The Basel school was pre-eminently epitomized, as Trevor-Roper lucidly recognized a generation ago, by Jacob Burckhardt. The second of Lionel Gossman's enterprises is a 'double biography' of Burckhardt and his contemporary compatriot Johan Jacob Bachofen. Both belonged to grand families of the Basel oligarchy but whereas Bachofen was a gentleman scholar of private means, Burckhardt was an academic dependent on a university stipend who trained in Germany, taught at the polytechnic in the thrusting little industrial town of Zürich during the first years of Swiss unification and then spent the rest of his career teaching and researching classical art history in his home town of Basel, the largest and most gracious of the allied city-states of the Helvetian plains. It is the history of Basel which forms the third element of Gossman's great *opus* and the one likely to be of greatest interest to readers of *Urban History*.

Basel began to rise to fame with the opening of the St Gothard mule-track which, from 1230, gradually began to bring goods overland from Italy to Flanders, thus making its trans-shipment harbour on the Rhine elbow a centre of gravity between Europe's two great poles of economic growth. Two
